Greetings Fun Planner,

We're sure your clients must be super excited about their upcoming cruise vacation! So, we'd like to provide you with some important information they will need for their cruise.

Certain countries require a yellow fever certificate of vaccination. Yellow fever is a serious disease caused by the yellow fever virus. It is found in certain parts of Africa and South America and is spread through the bite of an infected mosquito. Guests can minimize their risk by taking steps to avoid mosquito bites when outdoors. It cannot be spread person to person by direct contact.

While some countries require all travelers get a yellow fever vaccination, Barbados only requires a vaccination if the traveler is from areas infected with yellow fever, areas where yellow fever transmission has occurred (endemic areas), and for travelers having transited more than 12 hours through the airport of a country with risk of yellow fever transmission. If this does not apply to your clients, a yellow fever vaccine is not necessary.

Therefore, we strongly suggest all guests, traveling to or from Barbados, South America, or an African country visit the Centers for Disease Control and Prevention website at <http://www.cdc.gov/yellowfever/> for yellow fever certificate information, instructions, and country-by-country requirements.

Please remind your clients that proper travel documentation is required at embarkation and throughout the cruise. As much as we'd like to help your clients, it's their sole responsibility to have the required documents available at all times. We are sorry to say, if they do not have the proper travel documents, he/she will not be allowed on board. This also means we won't be providing a refund of their cruise fare.

We appreciate your assistance in passing this information along and can't wait to welcome your clients aboard for a Fun and memorable cruise vacation! Most importantly, we thank you for your continued support.

Sincerely,

Vicky Rey, CTC
